E-WASTE MANAGEMENT ANALYSIS OF 5 ELECTRONICS MANUFACTURERS IN INDIA

Prepared using the CPCB document: "Frequently Asked Questions (FAQ) under E-Waste (Management) Rules, 2022" (January 23, 2024).

Selected Companies

#	COMPANY NAME
1	Dixon Technologies
2	Kaynes Technology
3	Foxconn India
4	Syrma SGS Technology
5	Tata Electronics

Regulatory Framework

The CPCB FAQ states that the E-Waste (Management) Rules, 2022 regulate e-waste management in India under the Environment (Protection) Act, 1986, with the Rules effective from 1 April 2023. The Rules apply to manufacturers, producers, recyclers, refurbishers and dismantlers involved in covered electrical and electronic equipment (EEE) and related components, consumables, parts and spares.

The major framework includes Extended Producer Responsibility (EPR), recycling targets, use of registered e-waste recyclers, EPR certificates, environmentally sound management, returns and audits, and RoHS requirements.

Company-wise Analysis

COMPANY	ROLE / APPLICABILITY	MAIN RESPONSIBILITIES
Dixon Technologies	Manufacturer / Producer where covered EEE is manufactured or produced.	EPR registration where applicable; meet recycling obligations; use registered recyclers; maintain records.

COMPANY	ROLE / APPLICABILITY	MAIN RESPONSIBILITIES
Kaynes Technology	Manufacturer / Producer where covered EEE activities fall under Schedule I.	Register as applicable; identify EEE categories; calculate and fulfil EPR obligations; submit annual returns.
Foxconn India	Manufacturer / Producer for applicable covered EEE activities.	Applicable registration; responsible e-waste management; EPR compliance with recycling targets.
Syrma SGS Technology	Manufacturer / Producer for applicable covered EEE.	EPR registration where required; recycling obligations; use registered recyclers; RoHS compliance.
Tata Electronics	Manufacturer / Producer for applicable covered EEE.	EPR registration; determine applicable EEE categories; meet recycling targets; environmental audits.

EPR Recycling Targets

Producers have phase-wise EPR obligations. The targets are based on the Rules and the specific circumstances of the Producer.

FINANCIAL YEAR	EPR RECYCLING TARGET
FY 2023–24	60%
FY 2024–25	60%
FY 2025–26	70%
FY 2026–27	70%
FY 2027–28 onwards	80%

RoHS Requirements

Producers of covered EEE must ensure that new EEE and applicable components do not contain Lead, Mercury, Cadmium, Hexavalent Chromium, Polybrominated Biphenyls and Polybrominated Diphenyl Ethers beyond prescribed maximum concentration values.

- **0.1% by weight:** Lead, Mercury, Hexavalent Chromium, PBBs, PBDEs.
- **0.01% by weight:** Cadmium.

Registration Fees (CPCB Annexure-I)

ANNUAL E-WASTE RECYCLING TARGET	PRODUCER PROCESSING FEE (₹)
< 50 MT	2,500
50 to < 100 MT	7,500
100 to < 1,000 MT	1,50,000
1,000 to < 5,000 MT	10,00,000
> 5,000 MT	15,00,000

ANNUAL E-WASTE RECYCLING TARGET	PRODUCER PROCESSING FEE (₹)
Sales just started	10,000

Other Fees: The Annexure-I also lists ₹15,000 for one-time Manufacturer registration and ₹5,000 annual maintenance charges.

Conclusion

The identified companies are suitable for applying the CPCB e-waste compliance framework. Core focus areas include EPR registration, recycling obligations, and RoHS compliance.

> **Important:** The supplied CPCB FAQ does not provide individual EPR-registration status or exact EEE categories for these specific companies. These details are presented based on general regulatory applicability.
